About Me

Syllabus

STAT 302 Technology

- ▶ You may leave your video off or on. If you leave video on, please avoid doing anything distracting (playing with your cat, chugging a beer, playing LoL and screaming at your computer, etc.)
- ▶ Leave your sound muted by default.
- ▶ If you have a question, use the “raise hand” feature, and then hold the space bar to temporarily un-mute yourself and ask your question.
- ▶ I will be ignoring the chat unless I state that I will need responses to a question in the chat. You may use the chat to ask each other questions or for clarifications, but remember that I can see everything that is posted in the chat.
- ▶ All Zoom lectures will be recorded; no office hours will be recorded.

- ▶ This is where to ask all questions about the material, the homeworks, or the final project.
- ▶ Anonymous posting is enabled, but will be disabled if abused or if volume of anonymous posts is super high.
- ▶ Post questions in the correct folder. There are folders for each week of homework, the project, logistics, and general R & Statistics questions that aren't homework-specific. "Other" folder may be used to solicit TV recommendations, complain about your parents, etc., but don't expect me to check it much ;).
